The FCC should reject NAB's petition 04-160. I love my new satellite radio service. I pay for the services it provides including the up to the minute traffic and weather. You must not prevent them from carrying these services. There are times, that I couldn't even pick up local station in my car or places I have lived. XM has never let me down, if you let us down...the threat is severe. Many listeners may fail to get notices of weather problems in the area...leading to horrible conclusions. Just because the NAB doesn't like the success of XM doesn't mean that I am not entitled to owning it myself. This whole ideal that XM is hurting local radio is just phony. Sattellite TV and Cable has been running stations like the weather Channel for years....XM has just taken that level and expanded it.....not to hurt the radio medium....but to protect and inform it's consumers....if everyone would only care so much. Thanks!
